The purpose of this policy is to ensure that necessary records and documents are adequately protected and maintained and to ensure that records that are no longer needed are discarded at the appropriate time. It is recommended that each department have an established practice of retaining documents and an annual date for disposing of outdated records.

When developing departmental guidelines, consideration should be given to preserving institutional history by identifying materials that are suitable for the University Archives and arranging for transfer of appropriate materials at the appropriate time.

With the exception of the guidelines for computer systems and network backup and information retrieval adopted by the Information Technology Department, this policy applies to all records generated in the course of university operations including paper, digital and electronic records.

Documents should be retained in their original form unless otherwise specified.
